## CODE EXAMPLE:

```
import { useState, useEffect } from 'react'
import './Header.css'

function Header() {
  const [api, setApi] = useState([])
  useEffect(() => {
    fetch('https://fakestoreapi.com/products')
      .then(web => web.json())
      .then(web => { console.log(web); setApi(web) })
  }, [])
  return (
    <div className='FatherBlockOne'>
      <ul>{api.map((item, index) => {
        return (
          <li key={index}>
            <img src={item.image} />
            <p>{item.price}</p>
            <p>{item.category}</p>
          </li>
        )
      })}
      </ul>
    </div>
  )
}

export default Header;
```
